

My name is Chris Dauphin and I have been an Satellite Radio subscriber for over 2 years. Although I continue to listen to regular radio I greatly enjoy the choices that the paid services of Satellite Radio provides, specially when I am traveling. For the longest time I was of the opinion that they should offer localized weather and traffic and now that they are finally doing I come to find out that I am in jeopardy of loosing this valuable service. Please do not allow this to happen. Previously the only station I could turn to locally for weather and traffic was WTOP and it irritated me to have to listen to the constantly increasing number of advertisement, and also I was limited by the poor reception. Ever since XM added the traffic and weather channells I have options, and better yet no annoying advertisement. Please do not allow big bussiness to eliminate consumer choices. Sincerly,  
Christian Dauphin
